PROFILE • ABOUT ME

Versatile IT Professional: 9 years of experience, including 3 years as a backend developer and 6 years in DevOps/Site Reliability, currently leading Site Reliability initiatives as a Lead Site Reliability Engineer, driving innovation and operational excellence.
Backend & DevOps Mastery: Expertise in backend technologies like Node.js, Groovy, Docker, Kubernetes, Helm charts, Argo CD and Terraform, with a proven track record of streamlining development workflows and enhancing operational efficiency.
AWS Cloud & Infrastructure Automation: Advanced proficiency in AWS services (S3, EC2, CloudFront, ALB, Lambda, RDS) and VPC networking, leveraging tools like Terraform and GitHub Actions pipeline to automate and scale cloud infrastructure seamlessly.
Comprehensive Technical Skill Set: Deep experience with Linux, Shell scripting, YAML, ELK Stack, GitHub, Bitbucket, and Docker, ensuring reliable deployment and efficient management of complex environments.
Leadership & Mentorship: Strong leader with excellent communication skills, capable of guiding teams, mentoring junior engineers, and fostering cross-functional collaboration to deliver impactful solutions in high-pressure environments.

SKILLS

Cloud: AWS, SAP BTP.
Version control: GitHub, Bitbucket, Azure repository.
CI/CD tools: Jenkins, GitHub Actions.
IaC: Terraform.
Containerization & Orchestration: Docker, Docker-compose, Kubernetes, EKS, Helm, SAP Kyma, Argo CD.
Monitoring & Alerting: ELK, Cloudwatch, Prometheus, Grafana.
Artifacts: jFrog, Dockerhub, ECR.
Scripting & configuration languages: PowerShell, Groovy, YAML.
Development languages: node.js, JavaScript.
Data store: Kafka, PostgreSQL, MongoDB, RDS.
Mentoring and leadership: Team leadership, Technical mentorship, training and workshops.

WORK EXPERIENCE

Lead Engineer - Site Reliability

April 2025 - Current

Freshworks

Chennai, Tamil Nadu

1. Managed infrastructure as code using Terraform, ensuring consistency across environments by leveraging reusable modules, remote state management, and automated CI/CD pipelines for infrastructure deployment using GitHub Actions.

2. Implemented Kubernetes security best practices including RBAC, service accounts, and least-privilege access to restrict unauthorized actions within clusters.
3. Protected sensitive data by managing credentials and configuration with Kubernetes Secrets, integrated with external secret stores (AWS Secrets Manager).
4. Improved compliance & visibility through admission controllers (Gatekeeper), image vulnerability scanning, and automated security audits aligned with CIS Kubernetes benchmarks.
5. Collaborated as part of the central Kafka team, enabling all Freshworks product teams to reliably use the Kafka platform at scale.
6. Led the migration of Kafka infrastructure from EC2 instances to a Strimzi Operator–managed Kafka deployment on Amazon EKS, ensuring high availability and scalability.
7. Owned and optimized Kafka MirrorMaker 2 configurations to achieve seamless data replication and smooth migration with minimal downtime.
8. Provided 24/7 on-call production support, resolving P0/P1 incidents within SLA and ensuring uninterrupted data streaming for business-critical applications.

Senior Consultant - DevOps Lead *September 2020 - April 2025*
EY Global Delivery Service LLP *Chennai, Tamil Nadu*

1. Configured a Jenkins cluster from scratch and implemented a distributed build system using slaves and parallel builds, reducing build times by 50%. This optimization significantly improved the CI process efficiency, allowing faster and more reliable code deployments.
2. Successfully optimized AWS infrastructure and resource utilization, reducing overall cloud costs by 30% for a key client through strategic use of services, automation, and monitoring.
3. Implemented advanced security measures within the container, making the application highly resilient to unauthorized access and tampering during runtime.
4. Introduced Terraform to the client to automate infrastructure setup, significantly reducing manual effort and minimizing human errors. This automation streamlined deployment processes and enhanced the reliability of infrastructure management.
5. Created and managed an AWS EKS cluster, including the setup of CloudFront CDN for efficient content delivery and configuration of Application Load Balancers (ALBs) to ensure seamless routing and scaling of Kubernetes pods.
6. Developed, maintained, and deployed Kubernetes pods and services, configured AWS Ingress controllers, and managed configuration resources to ensure efficient and reliable application deployment within the cluster.
7. Implemented Dynatrace integration with AWS EKS and Lambda functions to provide end-to-end monitoring and observability. This setup enabled real-time performance tracking, automated anomaly detection, and enhanced visibility into application health and infrastructure metrics.
8. Utilized Continuous Integration and Delivery (CI/CD) services to deploy applications to the SAP Business Technology Platform (BTP). Integrated with the S/4HANA system via the Cloud Connector to streamline deployment processes and ensure seamless connectivity between applications and enterprise systems.
9. Recognized as a Subject Matter Expert (SME) in AWS, SAP BTP, and DevOps practices, serving as the primary resource for technical inquiries and strategic decision-making. Provided expert guidance on complex issues and contributed to shaping best practices and solutions.
10. Led a team of 10 professionals, overseeing their development and performance while managing DevOps projects and ensuring alignment with organizational goals.

11. Published several Points of View (POVs) on the business benefits of SAP Kyma, Docker usage for development, and DevOps in SAP BTP, offering strategic insights for leveraging modern technologies.
12. Delivered a lightweight, secure, and production-ready containerized solution, enhancing both performance and security for client deployments.
13. Secured cluster networking by implementing Istio service mesh policies to enforce micro-segmentation, control pod-to-pod communication, and enable zero-trust principles.

Senior Software Engineer - Backend Lead *July 2016 - September 2020*
Guidanz Inc *Chennai, Tamil Nadu*

1. Developed and implemented RESTful APIs, Websockets to facilitate efficient communication between front-end and back-end systems, enhancing system integration and data exchange.
2. Worked closely with cross-functional teams to gather requirements, design solutions, and deliver high-quality software, ensuring alignment with business objectives and user needs.
3. Implemented authentication and authorization mechanisms using JWT, OAuth and SSO to secure applications. Conducted regular security audits to identify and address vulnerabilities, ensuring robust protection of sensitive data and compliance with security standards.
4. Containerized the application using Docker and published it to Docker Hub, providing customers with a streamlined, easily accessible solution for deployment and use.
5. Deployed and utilized the ELK stack (Elasticsearch, Logstash, and Kibana) for comprehensive logging and monitoring of application performance.
6. Led a team in successfully migrating a Node.js application from Node.js 6 to Node.js 12, ensuring compatibility, improving performance, and addressing deprecated features. Oversaw the entire process, from planning and testing to deployment, while minimizing downtime and ensuring a smooth transition.
7. Managed a team of 5 developers, guiding project execution, overseeing development processes, and ensuring the delivery of high-quality software solutions. Facilitated collaboration, provided mentorship, and aligned team efforts with project goals and timelines.

EDUCATION

Master of Computer Applications, Computer Science Graduated, May 2016
Loyola college
Chennai, Tamil Nadu

Bachelor of Science, Mathematics Graduated, May 2013
Loyola College
Chennai, Tamil Nadu

TRAINING AND CERTIFICATIONS

- AWS Certified Solution Architect - Associate, July 2024
