

Guru Prasanth E

Lead Site Reliability Engineer

+91.8122382742

g.prasanth.7@gmail.com

Chennai, Tamil Nadu

PROFILE • ABOUT ME

Versatile IT Professional: Site Reliability Engineer with 10 years of IT experience, including 7 years in Site Reliability Engineering, DevOps, and Cloud Infrastructure, and 3 years in Backend Development. Experienced in designing, operating, and improving highly available cloud-native platforms on AWS and Kubernetes.

Cloud & Platform Engineering: Strong expertise in Amazon Web Services (AWS), Kubernetes (Amazon EKS), Terraform, Argo CD, GitOps, Docker, and Infrastructure as Code. Proven track record of building scalable, resilient, and secure production platforms.

Reliability & Operations: Extensive experience in production operations, incident management, root cause analysis, capacity planning, observability, monitoring, and automation. Skilled in maintaining high service availability while supporting business-critical applications through 24x7 on-call rotations.

Observability & Automation: Hands-on experience implementing monitoring, alerting, and operational dashboards using Prometheus, Grafana, ELK Stack, and cloud-native observability solutions. Strong focus on reducing operational toil through automation and self-healing mechanisms.

Security & Compliance: Experience implementing Kubernetes security best practices including RBAC, Secrets Management, Policy Enforcement, Admission Controllers, Vulnerability Scanning, and compliance controls aligned with industry standards.

Collaboration & Leadership: Strong communicator with experience working across platform, development, security, and operations teams to improve system reliability, deployment processes, and operational excellence.

ONLINE PRESENCE

LinkedIn: <https://www.linkedin.com/in/guru-prasanth-2003/>

GitHub: <https://github.com/Guruhbk>

Blogs: <https://guruprasanth.com/blog>

SKILLS

Cloud: AWS, SAP BTP.

Version control: GitHub, Bitbucket, Azure repository.

CI/CD tools: Jenkins, GitHub Actions, Argo CD.

IaC & CM: Terraform, Ansible.

Containerization & Orchestration: Docker, Docker-compose, Kubernetes, EKS, Helm, SAP Kyma.

Monitoring & Alerting: ELK, CloudWatch, Prometheus, Grafana, AlertManager.

Artifacts: jFrog, Dockerhub, ECR.

Scripting & configuration languages: Python, PowerShell, Groovy, YAML.

Development languages: Node.js, JavaScript.

Data store: Kafka, PostgreSQL, MongoDB, RDS.

Site Reliability Engineering: Incident Management, Root Cause Analysis (RCA), Production Support, On-Call Support, Capacity Planning, High Availability, Reliability Engineering, Automation

Mentoring and leadership: Team leadership, Technical mentorship, training, and workshops.

WORK EXPERIENCE

Lead Engineer - Site Reliability

April 2025 - Current

Freshworks Technologies Private Limited

Chennai, Tamil Nadu

- Lead the reliability, availability, and operational excellence of cloud-native platforms running on Amazon EKS, maintaining 99.9%+ service availability for business-critical production workloads.
- Architect and manage Infrastructure as Code (IaC) using Terraform, developing reusable modules and automated deployment workflows that significantly reduced manual provisioning efforts and improved infrastructure consistency across environments.
- Drive GitOps-based deployment strategies using Argo CD and GitHub Actions, enabling secure, auditable, and automated application releases while reducing deployment risk and operational overhead.
- Design and operate observability platforms using Prometheus, Grafana, and centralized logging solutions, improving visibility into application performance, infrastructure health, and service reliability.
- Implement proactive monitoring and alerting mechanisms that reduce Mean Time to Detect (MTTD) and accelerate incident response for critical production services.
- Own 24x7 production support and on-call operations, leading incident management for P0/P1 outages, resolving issues within SLA commitments, and driving root cause analysis to prevent recurrence.
- Develop automation solutions, operational tooling, and self-service capabilities that improve engineering productivity, reduce manual intervention, and enhance platform reliability.
- Implement Kubernetes security best practices, including RBAC, service accounts, admission controllers, and least-privilege access models, to strengthen cluster security and governance.
- Secure sensitive application data through integration with AWS Secrets Manager and Kubernetes Secrets, ensuring compliance with organizational security and operational standards.
- Improve platform compliance and governance through policy enforcement using Gatekeeper, image vulnerability scanning, and automated security audits aligned with CIS Kubernetes benchmarks.
- Partner with development, platform, networking, and security teams to improve deployment stability, operational readiness, scalability, and overall service resilience.
- Led the migration of distributed messaging infrastructure from EC2-based deployments to a Kubernetes-native architecture using Strimzi on Amazon EKS, improving scalability, operational efficiency, and platform resiliency while ensuring zero customer-impacting downtime during migration activities.
- Led Kafka platform modernization and migration initiatives on Amazon EKS, utilizing Cruise Control to automate partition rebalancing, optimize broker utilization, and maintain cluster balance during infrastructure changes while ensuring high availability and minimal service disruption.
- Contributed to capacity planning, performance optimization, and infrastructure scaling strategies, ensuring platform readiness to support growing business and application demands.

Senior Consultant - DevOps Lead

EY Global Delivery Service LLP

September 2020 - April 2025

Chennai, Tamil Nadu

- Configured a Jenkins cluster from scratch and implemented a distributed build system using slaves and parallel builds, reducing build times by 50%. This optimization significantly improved the CI process efficiency, allowing faster and more reliable code deployments.
- Successfully optimized AWS infrastructure and resource utilization, reducing overall cloud costs by 30% for a key client through strategic use of services, automation, and monitoring.
- Implemented advanced security measures within the container, making the application highly resilient to unauthorized access and tampering during runtime.
- Introduced Terraform to the client to automate infrastructure setup, significantly reducing manual effort and minimizing human errors. This automation streamlined deployment processes and enhanced the reliability of infrastructure management.
- Created and managed an AWS EKS cluster, including the setup of CloudFront CDN for efficient content delivery and configuration of Application Load Balancers (ALBs) to ensure seamless routing and scaling of Kubernetes pods.
- Developed, maintained, and deployed Kubernetes pods and services, configured AWS Ingress controllers, and managed configuration resources to ensure efficient and reliable application deployment within the cluster.
- Implemented Dynatrace integration with AWS EKS and Lambda functions to provide end-to-end monitoring and observability. This setup enabled real-time performance tracking, automated anomaly detection, and enhanced visibility into application health and infrastructure metrics.
- Utilized Continuous Integration and Delivery (CI/CD) services to deploy applications to the SAP Business Technology Platform (BTP). Integrated with the S/4HANA system via the Cloud Connector to streamline deployment processes and ensure seamless connectivity between applications and enterprise systems.
- Recognized as a Subject Matter Expert (SME) in AWS, SAP BTP, and DevOps practices, serving as the primary resource for technical inquiries and strategic decision-making. Provided expert guidance on complex issues and contributed to shaping best practices and solutions.
- Led a team of 10 professionals, overseeing their development and performance while managing DevOps projects and ensuring alignment with organizational goals.
- Delivered a lightweight, secure, and production-ready containerized solution, enhancing both performance and security for client deployments.
- Secured cluster networking by implementing Istio service mesh policies to enforce micro-segmentation, control pod-to-pod communication, and enable zero-trust principles.

Senior Software Engineer - Backend Lead

Guidanz Inc

July 2016 - September 2020

Chennai, Tamil Nadu

- Developed and implemented RESTful APIs, Websockets to facilitate efficient communication between front-end and back-end systems, enhancing system integration and data exchange.
- Worked closely with cross-functional teams to gather requirements, design solutions, and deliver high-quality software, ensuring alignment with business objectives and user needs.

- Implemented authentication and authorization mechanisms using JWT, OAuth and SSO to secure applications. Conducted regular security audits to identify and address vulnerabilities, ensuring robust protection of sensitive data and compliance with security standards.
- Containerized the application using Docker and published it to Docker Hub, providing customers with a streamlined, easily accessible solution for deployment and use.
- Deployed and utilized the ELK stack (Elasticsearch, Logstash, and Kibana) for comprehensive logging and monitoring of application performance.
- Led a team in successfully migrating a Node.js application from Node.js 6 to Node.js 12, ensuring compatibility, improving performance, and addressing deprecated features. Oversaw the entire process, from planning and testing to deployment, while minimizing downtime and ensuring a smooth transition.
- Managed a team of 5 developers, guiding project execution, overseeing development processes, and ensuring the delivery of high-quality software solutions. Facilitated collaboration, provided mentorship, and aligned team efforts with project goals and timelines.

EDUCATION

Master of Computer Applications, Computer Science Graduated, May 2016

Loyola college

Chennai, Tamil Nadu

Bachelor of Science, Mathematics

Graduated, May 2013

Loyola College

Chennai, Tamil Nadu

TRAINING AND CERTIFICATIONS

- AWS Certified Solution Architect - Associate, July 2024
